

## **TOP AND TILT CUSTOM FIT QUESTIONS**

1. What is the brand, model & year of tractor do you have?
2. Is your tractors hydraulic system closed center or open center?
3. OEM Top link Length-
4. How does your Side link mount on the top and the bottom?
5. What is the length of the fixed side link? (mount to mount) If top is ball mount, what is the pin diameter? Lower mounts are usually clevis mounts.
6. Does your tractor have a front-end loader? If so does the control valve have a power beyond port on it?
7. Does your tractor have exterior rear couplers?
8. If you want to purchase a complete system, where do you want to mount the control valve? You need to mount the control valve first to know how long you will need your hoses.
